

Navy Year 2000 Tracking System (NY2KTS)
Software Release Notes
Version 2.5
16 July 1999

- 99-49 Changed the F & I Embedded IT Devices Compliancy Status (Y2KFAC02R07) Report to allow the user to select by Major Claimant. Previously the report did not allow for any selection to produce the totals. Based on user feedback it has been changed to allow the user to select from a List of Values (LOV) of Major Claimants for report production or enter an asterisk (*) to select all Claimants.
- 99-50 Changed the F & I Reporting Subsystem reports (Y2KFAC02R03, 02R04, 02R05, 02R06, & 02R07) to process data based on the determination for Y2K Ready. These reports previously did not process selection criteria for items that were not Y2K Ready. The business rule logic is the same as that included in the NY2KTS Access Reporter, this is determined by the following logic:

Y2K_COMPLIANT <> 'Y' AND CONT_PLAN_IN_PLACE = 'Y'

- 99-51 Corrected a problem with the F & I Embedded IT Devices Compliancy Status (Y2KFAC02R07) Report which did not look at Product Category Codes that were entered into the database with lower case values. The report did not convert these to upper case, therefore data was not being included in the totals.
